

Airgas | BULK

an Air Liquide company

Optimize
production

Re-engineer your manufacturing process... one gas at a time

Industries rely on Airgas, an Air Liquide company, as a single-source supplier for standard and custom gases, equipment, and supply chain efficiency. In addition, you can count on our technical expertise in gas processes and equipment to help you improve production, increase profitability and drive efficiency in your production facility.

If your operation requires gas flow that exceeds 10,000 SCF or more per month, we can help. Airgas bulk distribution and storage solutions are designed to meet your needs.

- Uninterrupted supply of standard atmospheric gases, carbon dioxide, hydrogen and helium
- High-quality storage systems installed on-site and optimized for your process
- Flexible supply modes
- Improve production operation with facility safety audits
- Increase efficiency with remote telemetry monitoring
- Large national footprint of gas production plants

Bulk gas specialists

Airgas has over 100 bulk gas specialists dedicated to improving your unique process applications, as well as the industry's largest national footprint of production plants to ensure you have the right product, when and where you need it. Our bulk gas specialists can help you:

- Evaluate existing production processes
- Define the impact of production conditions on your bottom line
- Design a gas delivery system that yields optimum quality and efficiency
- Improve the throughput of your production process
- Improve overall fixed and variable costs of production
- With account services that continue after delivery

Optimal supply modes

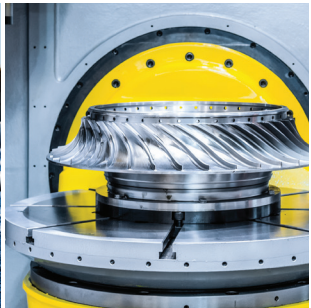

Improving your manufacturing process is your primary focus. We can help – tap into the expertise of bulk gas specialists at Airgas to determine the cost-effective supply mode that will enhance your profitability and improve your production. Whether it is cylinders, MicroBulk, large bulk or on-site gas generation, we can specify and engineer the most optimal gas supply solution for your particular process.

Industries served

Airgas' engineering expertise spans the entire manufacturing space and more.

- Aerospace
- Chemicals
- Food and beverage
- Glass
- Healthcare
- Metals and heat treating
- Oil and gas
- Power
- Water and wastewater processing
