

SAFETY DATA SHEET

Distributed by:

734-3438

Radnor Welding Products

Emergency number +1 (866)

100 Radnor, PA19087

259 N. Radnor-Chester Road - Suite

1. Identification

Product identifier Safety-Silv® 20, Safety-Silv® 25, Safety-Silv® 30, Safety-Silv® 35, Safety-Silv® 40,

Safety-Silv® 45, Safety-Silv® 50, Safety-Silv® 72

Other means of identification

SDS number 0010

Product type Solid wire and rod bare and flux coated

Synonyms High Silver Brazing Alloys containing Silver, Copper, Zinc or Silver and Copper

Recommended use Metal brazing.

Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Manufacturer/Supplier Harris Products Group

4501 Quality Place Mason, Ohio 45040 US

custservmason@jwharris.com

Telephone number 513-754-2000

Emergency Telephone

nhone 1 000 600 176

Numbers

1-888-609-1762 (US, Canada, Mexico only)

Please quote 333988

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Not classified.

OSHA defined hazards Not classified.

Label elements

Hazard symbol None.
Signal word None.

Hazard statement The mixture does not meet the criteria for classification.

Precautionary statement

Prevention Observe good industrial hygiene practices.

Response Wash hands after handling.

Storage Store away from incompatible materials.

Disposal Dispose of waste and residues in accordance with local authority requirements.

Hazard(s) not otherwise

classified (HNOC)

None known.

Supplemental information

FUMES AND GASES developed during product melting can be hazardous to your health. HEAT RAYS, (infrared radiation) from flame or hot metal can injure eyes. Wear correct eye, ear, and body protection. Chemical flux used with the product, or flux coating on the rod, may contain fluorides or other materials that generate hazardous fumes when heated.

3. Composition/information on ingredients

Mixtures

Chemical name	CAS number	%
Silver	7440-22-4	20 - 72
Copper	7440-50-8	25 - 50
Zinc	7440-66-6	10 - 40

Safety-Silv® 20, Safety-Silv® 25, Safety-Silv® 30, Safety-Silv® 35, Safety-Silv® 40, Safety-Silv® 45, Safety-Silv® 50, Safety-Silv® 50, Safety-Silv® 45, Safety-Silv® 50, Safety-Silv® 50, Safety-Silv® 45, Safety-Silv® 50, Safety

Flux

Chemical name	CAS number	%	
Potassium fluoroborate	14075-53-7	30 - 60	
Boric acid	10043-35-3	10 - 35	
Methacrylate polymer	Proprietary	1 - 5	
Water	7732-18-5	Balance	

Composition comments

Rods may be coated with flux containing Boric acid (CAS 10043-35-3) and Potassium fluoborate (CAS 14075-53-7). It can be reasonably assumed that on coated rods each of the flux constituents may comprise up to 30% by mass of the total mass.

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

4. First-aid measures

Inhalation Remove person from contaminated area to fresh air. Apply artificial respiration if needed. Call a

physician if symptoms develop or persist.

Remove contaminated clothes and rinse skin thoroughly with water for at least 15 minutes. Get Skin contact

medical attention if irritation develops and persists.

Rinse immediately with plenty of water for at least 15 minutes. Remove any contact lenses. Get Eye contact

medical attention if irritation develops or persists.

Do NOT induce vomiting. Immediately rinse mouth and drink a cupful of water. Never give anything Ingestion

by mouth to an unconscious person. Get medical attention immediately.

Most important symptoms/effects, acute and delayed

Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. Contact may cause irritation and redness. Dust may irritate respiratory system. Typical metal fume fever begins four to twelve hours after sufficient exposure to freshly formed fumes. The first symptoms are a metallic taste, dryness and irritation of the throat. Cough and shortness of breath may occur along with headache, fatigue, nausea, vomiting, muscle and joint pain, fever and chills. The syndrome runs its course in 24-48 hours.

Indication of immediate medical attention and special treatment needed

Treat symptomatically. Symptoms may be delayed.

General information Show this safety data sheet to the doctor in attendance.

5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing media

Specific hazards arising from

the chemical

Special protective equipment and precautions for firefighters

Fire fighting equipment/instructions Extinguish with foam, carbon dioxide or dry powder.

Do not use water or halogenated extinguishing media.

Fire or high temperatures create: Metal oxides.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Self-contained breathing apparatus and full protective clothing must be worn in case of fire. Move containers from fire area if you can do it without risk.

6. Accidental release measures

Personal precautions. protective equipment and emergency procedures

There is no spilled material. Product has metal rods or wire form.

Methods and materials for containment and cleaning up **Environmental precautions**

For waste disposal, see Section 13 of the SDS.

Avoid release to the environment.

7. Handling and storage

Precautions for safe handling

Avoid inhalation of dust and fumes. Use process enclosures, local exhaust ventilation, or other engineering controls to control sources of dust and fumes. Keep formation of airborne dusts to a minimum. Avoid contact with skin and eyes. Wear appropriate personal protective equipment (See Section 8). Do not get this material on clothing. Do not eat, drink or smoke when using the product. Wash thoroughly after handling. Avoid release to the environment.

Store in tightly closed original container in a dry, cool and well-ventilated place. Store in a closed container away from incompatible materials. Keep away from food, drink and animal feedingstuffs.

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)

Components	Туре	Value	Form
Copper (CAS 7440-50-8)	PEL	1 mg/m3	Dust and mist.
		0.1 mg/m3	Fume.
Silver (CAS 7440-22-4)	PEL	0.01 mg/m3	
Decomposition	Туре	Value	Form
Zinc oxide (CAS 1314-13-2)	PEL	5 mg/m3	Respirable fraction.
		5 mg/m3	Fume.
		15 mg/m3	Total dust.
Flux	Туре	Value	
Fluorides (CAS 16984-48-8)	PEL	2.5 mg/m3	
US. OSHA Table Z-2 (29 CFR 1910.	1000)		
Flux	Туре	Value	Form
Fluorides (CAS 16984-48-8)	TWA	2.5 mg/m3	Dust.
ACGIH			
Components	Туре	Value	Form
Copper (CAS 7440-50-8)	TWA	1 mg/m3	Dust and mist.
		0.2 mg/m3	Fume.
US. ACGIH Threshold Limit Values			
Components	Туре	Value	Form
Silver (CAS 7440-22-4)	TWA	0.1 mg/m3	Dust and fume.
Decomposition	Туре	Value	Form
Zinc oxide (CAS 1314-13-2)	STEL	10 mg/m3	Respirable fraction.
	TWA	2 mg/m3	Respirable fraction.
Flux	Туре	Value	Form
Boric acid (CAS 10043-35-3)	STEL	6 mg/m3	Inhalable fraction.
100 10 00 0,	TWA	2 mg/m3	Inhalable fraction.

Exposure guidelines

No exposure standards allocated.

Appropriate engineering controls

Provide adequate ventilation. Observe occupational exposure limits and minimize the risk of inhalation of dust and fumes. Shower, hand and eye washing facilities near the workplace are

recommended.

Individual protection measures, such as personal protective equipment

Wear safety glasses with side shields (or goggles). When these products are used in conjunction Eye/face protection

with brazing, it is recommended that safety glasses, goggles, or face-shield with filter lens of appropriate shade number (per ANSI Z49.1-1988, "Safety in Welding and Cutting") be worn.

Skin protection

Wear protective gloves (i.e. latex, nitrile, neoprene). Hand protection

Other Protective clothing is recommended. When these products are used in conjunction with brazing,

wear protective clothing that protects from sparks and flame (per ANSI Z49.1-1988, "Safety in

Welding and Cutting").

Use a respirator when local exhaust or ventilation is not adequate to keep exposures below the Respiratory protection

TLV. In a confined space a supplied respirator may be required. Selection and use of respiratory protective equipment should be in accordance with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. In case of inadequate ventilation or risk of inhalation of dust or fumes, use suitable respiratory equipment.

Thermal hazards Not available.

General hygiene Always observe good personal hygiene measures, such as washing after handling the material considerations

and before eating, drinking, and/or smoking. Routinely wash work clothing and protective

equipment to remove contaminants.

9. Physical and chemical properties

Appearance Wire and rods.

Solid. Physical state Solid. **Form**

Color Not available. Odor Odorless. Odor threshold Not available. Not applicable. Melting point/freezing point Not applicable. Initial boiling point and boiling Not available.

range

Not available. Flash point **Evaporation rate** Not available. Not available. Flammability (solid, gas) Upper/lower flammability or explosive limits

Flammability limit - lower

(%)

Not available.

Flammability limit - upper

Not available.

Not applicable. Vapor pressure Not applicable. Vapor density Not available. Relative density

Solubility(ies)

Insoluble. Solubility (water) Not available. **Partition coefficient**

(n-octanol/water)

Not available. **Auto-ignition temperature** Not available. **Decomposition temperature** Not available. **Viscosity**

10. Stability and reactivity

Reactivity The product is stable and non-reactive under normal conditions of use, storage and transport.

Chemical stability Material is stable under normal conditions. Possibility of hazardous

reactions

Hazardous polymerization does not occur.

Conditions to avoid

Contact with incompatible materials.

Incompatible materials

Strong oxidizing agents. Strong acids. Strong bases. Acetylene. Ammonia. Hydrogen peroxide (H2O2). Chlorine. Bromine, iodine, turpentine, magnesium metal. Hydrogen sulfide. Ammonium

nitrate.

Hazardous decomposition

products

Toxic metal oxides are emitted when heated above the melting point. Products containing flux may also release boric anhydride, fluoride compounds and hydrogen fluorides. Methacrylate polymer decomposes when heated and will release flammable vapors which irritate eyes and the

respiratory system. They comprise mainly n-butyl methacrylate (CAS 97-88-1).

11. Toxicological information

Information on likely routes of exposure

Inhalation May cause respiratory tract irritation. Lung damage and possible pulmonary edema can result

from dust exposure. Inhalation of fumes may cause a flu-like illness called metal fume fever.

Skin contact Dust may irritate skin. May cause allergic skin reaction. Exposure to hot material may cause

thermal burns.

Eve contact Fumes from heated material may cause eye irritation. Dust may irritate the eyes. Exposure to hot

material may cause thermal burns.

Ingestion Not a likely route of exposure as the product is a solid metal wire or rod.

Symptoms related to the physical, chemical and toxicological characteristics Contact may cause irritation and redness. Dust may irritate respiratory system. Symptoms of overexposure may be headache, dizziness, tiredness, nausea and vomiting. Typical metal fume fever begins four to twelve hours after sufficient exposure to freshly formed fumes. The first symptoms are a metallic taste, dryness and irritation of the throat. Cough and shortness of breath may occur along with headache, fatigue, nausea, vomiting, muscle and joint pain, fever and chills.

Information on toxicological effects

When heated, the vapors/fumes given off may cause respiratory tract irritation. High Acute toxicity

The syndrome runs its course in 24-48 hours.

concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of metal fume fever. Exposure to extremely high levels of fluorides can cause abdominal pain, diarrhea, muscular weakness, and convulsions. In extreme cases it can cause loss of consciousness and

death.

Toxicological data

Test Results Flux **Species**

Boric acid (CAS 10043-35-3)

Acute Dermal

LD50 Rabbit

> 2000 mg/kg

Oral

LD50 Rat 2660 mg/kg

Skin corrosion/irritation Serious eve damage/eve

irritation

Dust may irritate the eyes.

Dust may irritate skin.

Respiratory or skin sensitization

Respiratory sensitization Not a respiratory sensitizer.

This product is not expected to cause skin sensitization. Skin sensitization

Germ cell mutagenicity No data available.

This product is not considered to be a carcinogen by IARC, ACGIH, NTP, or OSHA. Carcinogenicity

IARC Monographs. Overall Evaluation of Carcinogenicity

Fluorides (CAS 16984-48-8) 3 Not classifiable as to carcinogenicity to humans.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Not listed.

This product is not reported to cause reproductive effects in humans. Clinical studies on test Reproductive toxicity

animals exposed to relatively high doses of the Boric Acid and Copper components of this product

indicate adverse reproductive effects.

Specific target organ toxicity single exposure

Not classified.

Safety-Silv® 20, Safety-Silv® 25, Safety-Silv® 30, Safety-Silv® 35, Safety-Silv® 40, Safety-Silv® 45, Safety-Silv® 50, Safety 917843 Version #: 01 Revision date: - Issue date: 07-July-2015

Specific target organ toxicity -

repeated exposure

Not classified.

Aspiration hazard

Not an aspiration hazard.

Chronic effects

Ingestion of silver may cause a permanently benign bluish gray discoloration to the skin (argyria). Repeated exposure to fluorides may cause excessive calcification of the bone and calcification of

ligaments of the ribs, pelvis and spinal column. Absorbed fluoride can cause metabolic

imbalances with irregular heartbeat, nausea, dizziness, vomiting and seizures. Chronic inhalation

of fumes or dust may cause irritation or other respiratory conditions (e.g., bronchitis).

Further information No other specific acute or chronic health impact noted.

12. Ecological information

Ecotoxicity Alloys in massive forms present a limited hazard for the environment.

Flux Species Test Results

Boric acid (CAS 10043-35-3)

Aquatic

Fish LC50 Razorback sucker (Xyrauchen texanus) > 100 mg/l, 96 hours

Persistence and degradability
The product is not biodegradable.

Bioaccumulative potentialThe product contains potentially bioaccumulating substances.

Mobility in soilNot available.Other adverse effectsNot available.

13. Disposal considerations

Disposal instructions Dispose in accordance with all applicable regulations.

Hazardous waste code D011: Waste Silver

Waste from residues / unused

products

Dispose of in accordance with local regulations. Scrapped material should be sent for refining to recover precious metal content. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.

Contaminated packaging Since emptied containers may retain product residue, follow label warnings even after container is

emptied.

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to Not applicable.

Annex II of MARPOL 73/78 and

the IBC Code

15. Regulatory information

US federal regulations This product is not hazardous according to OSHA 29CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
