

Total Gas Management™

Custom onsite solutions for visibility, control, savings

- Ensure continuity of your medical gas supply
- Measure efficiencies and provide transparency and KPIs with TGM dashboard
- Save time and streamline cost allocation
- Increase safety and reduce risks for your team and your patients
- Get access to gas and equipment expertise, right at your facility

Changing care. With you.

Managing medical gases is not an easy task. Efficiencies can certainly be lost in the daily and time-consuming management of the gases and equipment needed to keep your facility on schedule. Total Gas Management (TGM) from Airgas Healthcare provides a customized and comprehensive on-site gas management solution that includes order, inventory and operations management of your vital gas supply, plus an Airgas Healthcare technician, right in your facility.

Applications

- Healthcare
- Pharmaceutical and biotechnology
- Research

Total Gas Management™

A customized supply chain solution

An Airgas Healthcare technician, right on your site

Total Gas Management (TGM) services from Airgas include a highly skilled and dedicated technician at your facility to implement supply chain efficiencies, manage your gases and equipment, and improve safety compliance:

Safety and patient care

- Save time and focus on providing quality patient care instead
- Improve safety
- Avoid medical gas runout

Efficiency

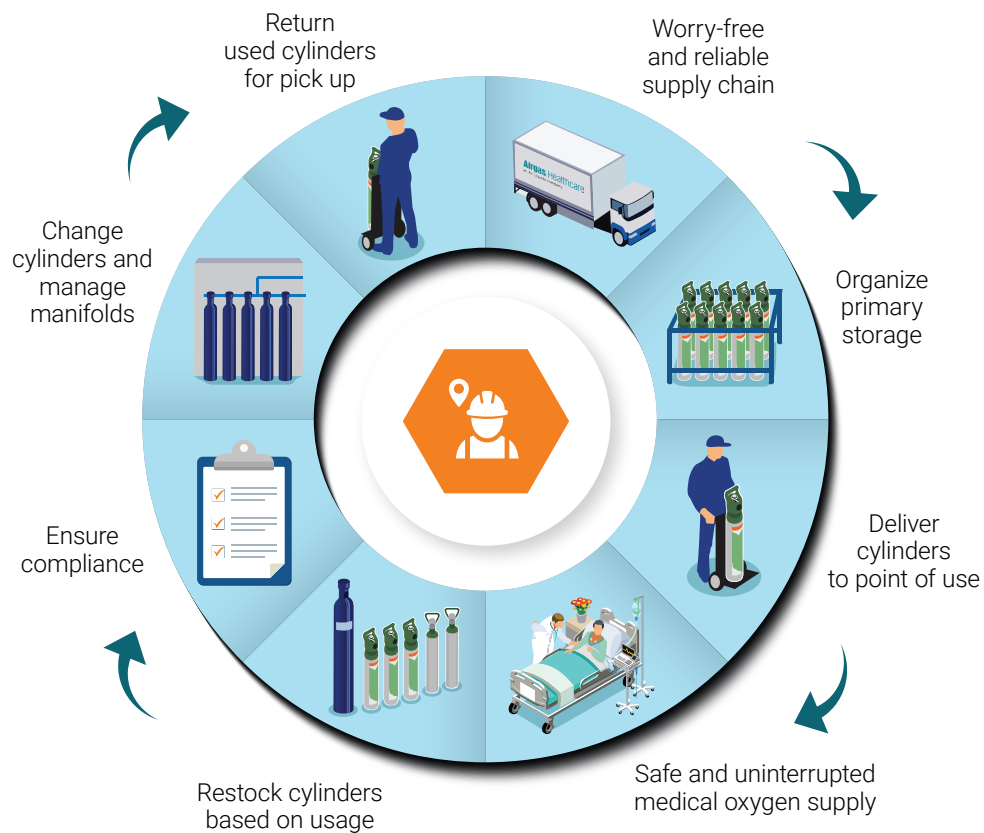

- Maintain continuity of gas supply
- Reduce total inventory management costs
- Minimize gas waste and cylinder loss
- Streamline cost allocation

On-site expertise

- Well versed in best practices for large facilities
- Dedicated to meeting your unique requirements
- Improve inventory management with other supply chain technologies like EZ-TRAC™, EZ-GAZ™ and more

Focus on patient care instead

It's easy when you have Total Gas Management from Airgas Healthcare to manage your supply chain.
